NIEHS Postdoctoral Fellowship

As part of an NIEHS Training Grant on “Environmental Influences on Health Outcomes” (PI: Dr. Pam Factor-Litvak), the Department of Epidemiology of the Mailman School of Public Health in collaboration with the Columbia Aging Center are seeking applications for a NIEHS Postdoctoral Fellowship. The fellowship will begin at the earliest possible date.

The prestigious fellowship will run for 2-3 years depending on progress. Successful candidates are expected to actively participate in one Seminar per semester. Applicants have a PhD in fields like epidemiology, environmental health sciences, life-course sociology or lifespan psychology. Their research interest should be in the area of investigating the cumulative contextual effects on later life health outcomes. Expertise in longitudinal methods is expected.

If you are interested please contact Dr. Ursula M. Staudinger, Director, Robert N. Butler Columbia Aging Center, umstaudinger@columbia.edu.
